

TECHNICAL DOCUMENTATION

PROTECFILM

PLASTIC ELECTROSTATIC FILM
FOR SPRAY BOOTH WALLS

DÉSIGNATION

PROTECFILM is a protective film specially designed to allow painting professionals to always work in a clean spray booth. Its electrostatic effect ensures total adherence to your spray booth walls.

PROTECTION

INSTRUCTIONS FOR USE

Clean your spray booth walls and whiten dark areas.

Use magnetic strips to fasten the film approximately 2 metres from the ground and unroll the film.

Apply magnets on the plastic and progress around the spray booth.

If the film doubles on itself, pull back to free electrostaticity and reapply to walls. Smooth film using a brush to ensure a perfect finish.

PACKAGING

Packaged in rolls

Length : 100 Meters

Width : 2 Meters
